Mathematics II. Kluwer Academic Publishers,
Dordrecht, Boston, London 1994,
(942 p., ISBN: 0-7923-0681-3)**

CONTENTS OF 4 CHAPTERS (TOMÁŠ CIPRA)

33. PROBABILITY THEORY	688
33.1 Random event and probability	688
33.2 Conditional probability and independent events	691
33.3 Random variables and probability distributions	694
33.4 Basic characteristics of random variables	697
33.5 Random vectors	704
33.6 Important discrete distributions	710
33.7 Important continuous distribution	714
33.8 Important multivariate distribution	725
33.9 Transformations of random variables	727
33.10 Some inequalities	729
33.11 Limit theorems in probability theory	730
33.12 Law of large numbers	731
33.13 Central limit theorem	733
34. MATHEMATICAL STATISTICS	735
34.1 Basic concepts	735
34.2 Sample characteristics	736
34.3 Random sample from normal distribution	738
34.4 Ordered random sample	739
34.5 Elementary statistical treatment	741
34.6 Estimation theory	745
34.7 Point estimators	749
34.8 Interval estimators	752
34.9 Hypothesis testing	755
34.10 Tests of hypotheses on parameters of normal distributions	756
34.11 Goodness of fit tests	760
34.12 Contingency tables	763
35. TOPICS IN STATISTICAL INFERENCE	766
A. <i>Regression Analysis. Fitting Curves to Empirical Data. Calculus of Observations..</i>	766
35.1 Regression in statistics	766
35.2 Linear regression model	768

35.3	Normal linear regression model	773
35.4	Linear regression	775
35.5	Polynomial regression	776
35.6	Generalized linear regression model. Calculus of observations	777
35.7	Nonlinear regression	779
B.	<i>Analysis of Variance</i>	782
35.8	Principle of the analysis of variance	782
35.9	One-way classification	783
C.	<i>Multivariate Analysis</i>	785
D.	<i>Reliability Theory</i>	786
35.10	Basic reliability concepts	786
35.11	Estimation of reliability characteristics	789
E.	<i>Statistical Principles of Quality Control</i>	792
35.12	Acceptance sampling	792
35.13	Sequential acceptance sampling	795
36.	STOCHASTIC PROCESSES	797
36.1	Classification of stochastic processes	797
A.	<i>Markov Processes</i>	799
36.2	Concept of Markov processes	799
36.3	Examples of Markov processes	802
36.4	Markov chains	804
B.	<i>Queueing Theory</i>	806
36.5	Service systems	806
36.6	Examples of service systems	807
C.	<i>Stationary Processes</i>	810
36.7	Correlation properties of stationary processes	810
36.8	Spectral properties of stationary processes	814
