Exercises

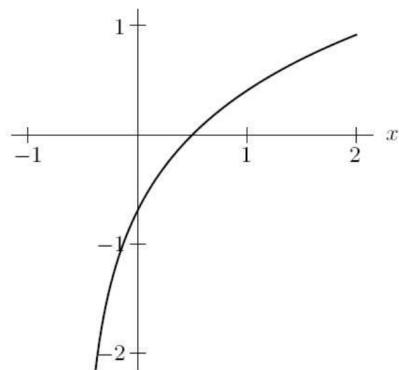

- Find the graph of 2^x

- Find the graph of ab^x , $b > 1$:

3. Find the function for the graph:

- (A) $\ln x + \frac{1}{2}$
(B) $\ln x - \frac{1}{2}$
(C) $\ln(x + \frac{1}{2})$
(D) $\ln(x - \frac{1}{2})$

4. Find t , if $100 = 50e^t$:

- (A) $t = \ln 2$ (B) $t = \frac{\ln 100}{\ln 50}$ (C) $t = \frac{\ln 100}{50}$ (D) $t = 100e^{50}$

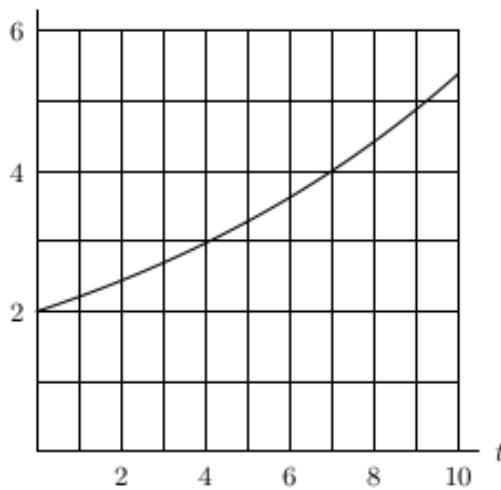

5. Solve for x : $8y = 3e^x$

- (A) $\ln 8 + \ln 3 + \ln y$ (C) $\ln 8 + \ln y - \ln 3$
(B) $\ln 3 - \ln 8 + \ln y$ (D) $\ln 3 - \ln 8 - \ln y$

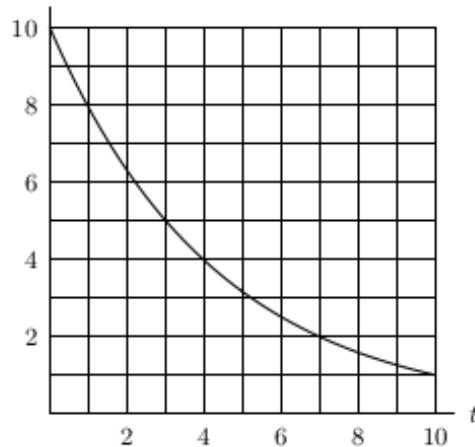

6. Find function(s) which is increasing and convex:

- (A) 3^{-x} (B) 2^x (C) $\ln x$ (D) $-\ln x$

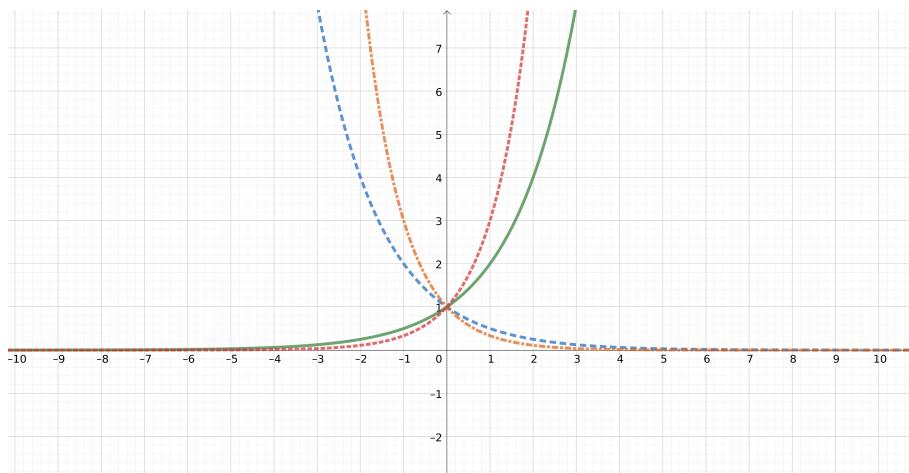

7. Find the doubling time for the exponential growth:

8. Find the half-life for the exponential decay:

9. Find functions: $y = 3^x$, $y = 2^x$, $y = 2^{-x}$, $y = \left(\frac{1}{3}\right)^x$:

10. In 1988, the inflation rate in Nicaragua was average 1.3% a day. Which formula represents the rate of inflation? (t is in days and I_0 represents the initial inflation.)

- | | |
|-----------------------------|--------------------------|
| (A) $I(t) = I_0 e^{0.013t}$ | (D) $I(t) = I_0(1.013)t$ |
| (B) $I(t) = I_0 e^{1.3t}$ | (E) $I(t) = I_0(1.3)^t$ |
| (C) $I(t) = I_0(1.013)^t$ | |

11. A student drinks a cup of coffee with 100 mg of caffeine. The half-life of caffeine is 4 hours. We want to know, when the amount of caffeine in the body is down to 10mg. Which formulae helps us? (And how?)

- | | | |
|----------------------|----------------------|---------------------|
| (A) $10 = 100e^{4k}$ | (C) $50 = 100e^{4k}$ | (E) $P = 100/10e^4$ |
| (B) $100 = 10e^{4k}$ | (D) $10 = 100/4e^k$ | |

12. At midnight, a patient received 25 mg of a drug. The amount of the drug in the body decreases by 12% each hour. How we can describe the amount of the drug in the body? (As a function of time t .)

- (A) $A(t) = 25 - 12t$ (D) $A(t) = 25(0.88)^t$ (G) $A(t) = 12(0.25)^t$
 (B) $A(t) = 25 - 0.12t$ (E) $A(t) = 25(1.88)^t$
 (C) $A(t) = 25(0.12)^t$ (F) $A(t) = 25(-0.12)^t$

13. Find functions: $y = \ln x$, $y = |\ln x|$, $y = \ln(|x|)$, $y = \ln(-x)$, $y = -\ln x$.
