Contents

List of Basic Notations and Frequently Used Symbols	1
A. Measures and Measurable Functions	2
1. The Lebesgue Measure	
2. Abstract Measures	
3. Measurable Functions	
4. Construction of Measures from Outer Measures	
5. Classes of Sets and Set Functions	
6. Signed and Complex Measures	
B. The Abstract Lebesgue Integral	27
7. Integration on \mathbf{R}	
8. The Abstract Lebesgue Integral	
9. Integrals Depending on a Parameter	
10. The L^p Spaces	
11. Product Measures and the Fubini Theorem	
12. Sequences of Measurable Functions	
13. The Radon-Nikodým Theorem and the Lebesgue Decomposition	
C. Radon Integral and Measure	57
14. Radon Integral	
15. Radon Measures	
16. Riesz Representation Theorem	
17. Sequences of Measures	
18. Luzin's Theorem	
19. Measures on Topological Groups	
D. Integration on \mathbf{R}	82
20. Integral and Differentiation	
21. Functions of Finite Variation and Absolutely Continuous Functions	
22. Theorems on Almost Everywhere Differentiation	
23. Indefinite Lebesgue Integral and Absolute Continuity	
24. Radon Measures on \mathbf{R} and Distribution Functions	
25. Henstock–Kurzweil Integral	
E. Integration on \mathbf{R}^n	103
26. Lebesgue Measure and Integral on \mathbf{R}^n	
27. Covering Theorems	
28. Differentiation of Measures	
29. Lebesgue Density Theorem and Approximately Continuous Functions	
30. Lipschitz Functions	
31. Approximation Theorems	
32. Distributions	
33. Fourier Transform	
F. Change of Variable and k-dimensional Measures	141
34. Change of Variable Theorem	
35. The Degree of a Mapping	
36. Hausdorff Measures	
G. Surface and Curve Integrals	163
37. Integral Calculus in Vector Analysis	
38. Integration of Differential Forms	
39. Integration on Manifolds	
H. Vector Integration	191

40. Measurable Functions	
41. Vector Measures	
42. The Bochner Integral	
43. The Dunford and Pettis Integrals	
Appendix on Topology	203
References	206
A Short Guide to the Notation	217
Subject Index	219
