Life Insurance 2 - Requirements for the Course Credit

To get the course credit it is necessary:

- to solve three homework assignments in sufficient quality (two theoretical/computational assignments and one task in Prophet are planned),
- to pass the final test, i.e., to get at least 70 % of the total points.

In case that the homework assignment is not solved correctly, there is one possibility to improve it for each assignment. As for the final test, there are two possibilities to pass it (one regular term and one retake).
