

Mathematics of Life Insurance 2

Requirements for the Course Credit

To get the course credit it is necessary:

- to successfully solve two homework assignments, i.e., to obtain at least 70 % of available points in total,
- to pass the final test, i.e., to achieve at least 70 %.

In case of reaching 60-69 % after submitting solutions to all homework assignments, you will be given one additional homework assignment. As for the final test, there are two possibilities to pass it (one regular term and one retake).
